

# Pesticide Recertification Courses 2011

Sponsored by:  
Integrated Plant  
Protection Center  
and  
Oregon State University  
Extension Services

November 23, 2010

To: Oregon Commercial and Public Pesticide Applicators,  
Pesticide Consultants, Operators, and Dealers

Annually, the OSU Extension Service offers training related to pest and pesticide management. While these training courses permit pesticide applicators to earn credits towards pesticide license recertification, our purpose is more than simply maintaining a license. As we learn more about pest and pesticide management, we can utilize pesticides in a more responsible, effective, and efficient manner. This makes good sense for agriculture, forestry, the general population, and the environment.

Course programs in this catalog are as complete as possible. Recertification credit hours have not been confirmed by the Oregon Department of Agriculture in all cases. However, our estimates should be close.

Remember, ODA is the institution granting a pesticide license. Since 1978, ODA has provided two methods by which pesticide applicators and consultants may become recertified: 1) successfully complete the required examination(s), or 2) attend short courses or other training programs approved by ODA for this purpose.

In order to become recertified by the credit hour accumulation method, an individual must accumulate a total of 40 credit hours during their five-year certification period. A maximum of 15 credit hours will be recognized in any one calendar year. If you have questions about recertification credits please call ODA, Pesticides Division at (503) 986-4635.

To reduce costs, a single registration form is provided in this catalog. Course registration may vary, so please pay close attention to the instructions given in each course outline.

You can **pay online by credit card** for the following courses:

- Chemical Applicators Short Course
- Non Crop Vegetation Management Course
- Central Oregon Pest Management Course
- Urban Pest Management Course

Suggestions and comments for improving the overall quality of these training programs should be directed to Tim Stock, IPPC/OSU, 2040 Cordley Hall, Corvallis, Oregon, 97331-2915, tel. (541) 737-6279 or 737-3541.

Sincerely,

Tim Stock, Coordinator  
Pesticide Safety Education Program

# Oregon Pesticide Safety Education Manual

The Oregon Pesticide Safety Education Manual is the basic manual for all pesticide applicators in Oregon. This 273 page reference manual will help prepare you for the Oregon "private applicator" and the "laws and safety" examinations, administered by the Oregon Department of Agriculture. Questions for these exams will be taken from material presented in this manual. **This manual is also intended to serve as a reference source for those who are already certified to apply pesticides.**

The sale price of \$22.50 (plus \$6.00 shipping/handling) for the manual reflects production and distribution costs incurred by the OSU Extension Service. Visa and MasterCard are accepted. Request pickup at your local county extension office to save shipping/handling charge.
